SECTION I

INTRODUCTION

1. General

a. This manual is an illustrated list of repair parts and special tools authorized for field maintenance (general and direct support) of the subject materiel.

b. For direct support maintenance, this list contains all items authorized for initial stockage for direct support maintenance and for supply support to organizational maintenance. For allowance factors for those items, see TM 9-2300-223-34P.

c. For general support maintenance, this list contains items authorized for initial stockage for general support maintenance. For allowance factors for these items, see TM 9-2300-223-34P.

d. The nonsupply items are not stocked for issue and are contained herein for identification only. They are not allocated in the maintenance columns.

e. For prices of Ordnance items listed herein, see the appropriate supply manual of the SM 9-2-series, Stock List of All Items Price List. Prices of items that are the responsibility of technical services other than Ordnance may be obtained from the appropriate type-2 supply manuals for those services.

f. Additional applications of items in this manual are listed in the supply manuals of the SM 9-3-series, Stock List of Repair Parts.

2. Illustration and Text Relationship

a. Illustrated supply items are keyed by numbers to their text listing. In all cases, the illustration and its listing will be on the same or the facing page.

b. Nonillustrated supply items, if any, are listed under the text of the illustrated assembly to which they are most closely related.

c. Nonsupply items are not listed in the text but will be identified by name, part number in a legend on the illustration and the identifying key number will be encircled to indicate nonsupply status.

3. Requisition Notes

a. If the item requisitioned is not furnished, of if other action is necessary, the nature of the action taken by the supplying agency will be indicated by standard symbols on prescribed forms.

b. When requisitioning an item, the requesting agency will order the listed item. However, the supplying agencies will take necessary action to issue the exhaust stock item until stock is exhausted,

whether it be an individual item, kit, set, or assembly.

c. Special purpose kits, i.e., winterization, etc., must be requisitioned separately, since they are not furnished with each vehicle. Supply lead time should also be considered when placing requisitions for these special kits so they may be on hand when needed.

4. Explanation of Columns

a. *Illustrations.* This column indicates the figure number of the illustration that depicts the item. When more than one item appears on the illustration, the item number is also indicated.

b. *Source, Maintenance, and Recoverability Code.* This column lists a code that indicates the selection status and source of supply of the repair part, the lowest category of maintenance to install or manufacture the repair part, and the recoverability and expendability aspects of the repair part. An example of this code is P-O-R. The "P" indicates that the item is a mission stockage list repair part procured and stocked on a national program basis, the "O" indicates the repair part is authorized to organizational maintenance, and the "R" indicates that the repair part is an expendable, recoverable item. When repair parts supply responsibility has been assigned to a materiel agency other than Ordnance, the basic number of a supplying materiel agency is listed in column 2a, for example, "11" for a Signal materiel item. Refer to paragraph 10 for an explanation of all codes appearing in this manual.

c. *Federal Stock Number.* This column lists the Federal stock number assigned by the Cataloging Division, Armed Forces Supply Support Center.

d. *Description.* The Federal item's name (shown in capital letters) and any additional description required for supply operations are listed in this column. All dimensions listed are in inches unless otherwise specified. For further identification, the materiel control or manufacturer's part number is parenthetically listed at the end of each nomenclature.

e. *Unit of Issue.* The unit of issue column lists the actual unit of issue for each item (ea, lg, ft, etc.).

f. *Quantity Incorporated in Unit.* The quantity shown in this column indicates the number of items required for the particular use indicated. This

quantity does not reflect the total quantity of the part required for the vehicle since it may have other functional uses.

g. 15-Day Field Maintenance Allowance Per 100 Major Items. No quantities are listed in these columns. Refer to TM 9-2300-223-34P, Consolidated Authorized Stockage Lists, for allowance factors of items to be stocked. If an item appears herein and is not listed in TM 9-2300-223-34P, it can be requisitioned for immediate use or stockage in accordance with AR 711-16.

5. How To Find Parts

Parts may be located if one of the following identifying factors is known. All references list the page numbers on which the assembly or part may be found.

a. Major Component, Assembly, or Location. Refer to Visual Guide to Contents on pages

b. Function, Use, or Location. Refer to the table of contents which lists the titles of illustrations and nonillustrated items. The nonillustrated items, if any, are listed with closely related illustrated assemblies or components.

c. Nomenclature (basic noun name). Refer to the alphabetical index on page 000

d. Federal Stock Number. Refer to the Federal stock number index on page 000

e. Ordnance or Manufacturer's Part Number Index. Refer to the ordnance or manufacturer's part number index on page 000

6. Attaching Parts

In some cases, nonillustrated, attaching and/or closely related items are listed indented directly beneath the items to which they pertain.

7. Pertinent Publications

The following publications pertain to this vehicle and its components.

LO 9-2330-208-12

Lubrication Order for Truck, Ambulance: front line, 1/4-ton, 4 x 4, M170 and Truck, utility: 1/4-ton, 4 x 4, M38A1 and M38A1C.

Operator and Organizational Maintenance Manual for Truck, Ambulance: front line, 1/4-ton, 4 x 4, M170 and Truck, utility: 1/4-ton, 4 x 4, M38A1 and M38A1C.

TM 9-8015-1

Ordnance Maintenance Manual for Engine (Willys-Overland Model MD) and clutch for 1/4-ton, 4 x 4, utility truck M38A1.

TM 9-8015-2

Ordnance Maintenance Manual for Power train, body and frame for 1/4-ton, 4 x 4, utility truck M38A1 and 1/4-ton, 4 x 4 front line ambulance M170.

TM 9-2320-208-20P

Direct and General Support Maintenance Manual for Truck, Ambulance: front line, 1/4-ton, 4 x 4, M170 and Truck, utility: 1/4-ton, 4 x 4, M38A1 and M38A1C.

8. Special Information

a. When requisitioning repair parts kits, the user is cautioned to note that many kit components are available for issue separately. When a kit component is available separately, it will be listed under the kit entry with a separate Federal Stock Number, issue, and allowance data.

b. Installation of special purpose kits is authorized under criteria defined in SB 9-16 for winterization kits, SB 9-155 for the deepwater fording kit, and SB 11-131 for the 100-ampere generator kit when certain radio equipment is authorized. When requisitioning these special purpose kits, the user is cautioned to take into consideration supply lead time. Refer to the appropriate vehicle modifications required to the vehicle prior to application of the kits.

c. Whenever an illustration appears in this manual without certain items being designated by a number callout, this means that these items are applied only at organizational maintenance level. Items of such will appear in TM 9-2320-208-20P.

b. Symbols.

- ☆☆ Indicates items available as part of kit or set.
- † As required
- ☆ Item available separately.

10. Explanation of Codes

a. Source Code.

- P—Applies to repair parts which are high mortality parts; procured by materiel control agencies stocked in and supplied from the Army depot system, and authorized for use at indicated categories of maintenance.
- C—Applies to repair parts authorized for local procurement. If not obtainable from local procurement, such repair parts will be requisitioned through normal supply channels with a supporting statement of nonavailability from local procurement.
- M—Applies to repair parts which are not procured or stocked but are to be manufactured by using units at indicated maintenance echelons.
- P1—Applies to repair parts which are low mortality parts; procured by materiel control agencies and authorized for installation at indicated categories of maintenance.

b. Maintenance Code.

- O Organizational Maintenance
- F Field Maintenance Direct Support
- H Field Maintenance General Support

c. Recoverable Code.

- R—Indicates a repair part or assembly that is expendable and recoverable and is economically repairable and, when available, is furnished by supply on an exchange basis and which may be placed in "ready for issue" condition by one or more of the refinishing, cleaning, replating, anodizing, adjusting, welding, etc., processes.

11. Manufacturers' Symbols

12. Suggestions and Recommendations

The direct reporting by the individual user of errors, omissions, and recommendations for improving this manual is authorized and encouraged. DA Form 2028 (Recommended Changes to DA Publications) will be used for reporting these improvement recommendations. This form will be completed using pencil, pen, or typewriter, and forwarded direct to Commanding General, U.S. Army Tank-Automotive Center, ATTN: SMOTA-MS, Warren, Mich., 48090.

13. Special Tool Kits For Ordnance Personnel

Special tools required by Ordnance organizations for maintenance of the major item are issued as required. Applicable tool kits are listed in section III.

ORDNANCE AND MANUFACTURER'S PART NUMBER INDEX

This index is prepared in strict numerical sequence; that is, all letters or dashes prefixed, suffixed, or interspersed in the numbers are disregarded. For instance: 33-H-770 is in sequence as 33770, but the complete number is shown in the listing. All Ordnance numbers appear without any symbol prefix. Standard hardware items are not included in this index because of their common application. All numbers prefixed by a series of 5 numbers followed by a dash (e.g., 63477-FC5917) indicate a Manufacturer's or Military Standard part number. A cross-reference of these 5-digit numbers to their related commodity will be found in Section I—Preface under "Manufacturer's Symbols."
